Summary

Engineering Manager and PMP-certified technology leader with 13+ years of experience in enterprise application development, cloud architecture, and cross-functional leadership across global markets — including client delivery for organizations in the U.S., Australia, and New Zealand. Currently serving as both Engineering Manager and sole Scrum Master for the team, leading distributed Agile delivery on .NET/C#, Angular, Azure, and AKS/Kubernetes, while personally building and shipping code using AI-assisted tools including Claude, GitHub Copilot, and Cursor.

Skills

Languages & Frameworks: .NET, .NET Core, ASP.NET Core, C#, Angular (7–20), TypeScript, RxJS, NgRx
Architecture & Cloud: Microservices, REST APIs, HLD, Cloud-Native Design, Azure, AKS, Kubernetes, Docker
DevOps & Data: Azure DevOps, CI/CD, Git, SQL Server, Entity Framework
Tools: Genesys Cloud, WebRTC, New Relic, Swagger, Postman
AI Tools: Claude, GitHub Copilot, Cursor

Core Competencies

Engineering Leadership • Technical Project Management • Delivery Management • Team Management / People Management • Stakeholder Management • Scrum Master / Agile Delivery • Sprint Planning & Retrospectives • Cross-Functional Leadership • Risk & Release Management • Feature Development & Delivery • CI/CD & DevOps • AI-Assisted Development

Work Experience

Engineering Manager Sep 2025 – Present
New American Funding Chennai, India

- Roles & Responsibilities**
- Own engineering execution and the full delivery lifecycle for a U.S. mortgage platform — from requirements through development and feature delivery.
 - Serve as the sole Scrum Master for the team, in addition to Engineering Manager duties — running daily stand-ups, sprint planning, backlog grooming, and retrospectives; facilitate cross-functional alignment with Product and Architecture.
 - Personally build and ship features using AI-assisted development — pairing with Claude, GitHub Copilot, and Cursor — cutting development time.
 - Shape HLD and architecture decisions across Angular, .NET microservices, and Azure/AKS; mentor engineering leads and developers.
 - Review pull requests daily to maintain accurate, defect-free code prior to production deployment.

- Key Achievement**
- Led the migration of Loan Officer calling functionality from Genesys Cloud's standalone application directly into our own platform — integrating Genesys Cloud/WebRTC APIs so agents log in and make calls within our application, eliminating dependency on the separate Genesys interface.

Engineering Manager Sep 2024 – Aug 2025
Propel Infotec Chennai, India

- Led end-to-end delivery across UI and API workstreams for insurance and device-protection applications.
- Directed sprint planning, backlog grooming, stakeholder demos, and dependency management.
- Owned performance reviews and mentored technical leads and team members.

Engineering Manager Oct 2022 – Aug 2024
WinWire Technologies Bengaluru, India

- Owned project timelines, effort estimation, sprint tracking, and client-facing delivery commitments for a U.S. HR/payroll platform.
- Directed a 20-member team across two distributed Agile pods, coordinating Angular/.NET development and API delivery.
- Led Azure service integration, release planning, and production-readiness reviews.
- Drove SQL Server performance tuning — index maintenance and query optimization — to improve application responsiveness.

Earlier Roles

Mar 2013 – Aug 2022

IT Consultant/Project Lead (ATOS Syntel) • Technical Project Lead (Happiest Minds) • Sr. Software Engineer/Module Lead (GAVS) • Technology Analyst (Infosys) • Sr. Software Engineer (Mindtree) • Junior Analyst (Coromandel Infotech)

Progressed from developer to technical/delivery lead over 9 years across HR automation, logistics, documentation workflow, and billing systems.

Projects

RelativityOne — Relativity, USA

Oct 2022 – Aug 2024

- Document management system for case documents and litigation review, supporting multi-reviewer access across a 20-member team on two distributed Agile pods.
- Developed Web API endpoints, stored procedures for CRUD operations, and implemented authentication to secure the API.

Cloud Creator — Revera, New Zealand

Jan 2020 – Jun 2021

- Cloud management portal spanning private VMware infrastructure and Azure/AWS; led technical design, development, API integration, and SQL performance optimization.

eFlow — Link Group, Australia

Aug 2017 – Dec 2019

- Enterprise document-capture and workflow platform for scanned-document ingestion and metadata processing; led requirement analysis, implementation, and technical mentoring.

Mobile Device Protection Platform — LikeWize, USA

- Configurable device-protection platform covering insurance coverage and eligibility workflows; drove Scrum planning, resourcing, and release coordination.

CCTNS — Haryana Police, India

Apr 2015 – Jul 2017

- Provided ASP.NET/C#/SQL Server support and enhancements for a statewide crime-tracking network system.

TTD Seva Online — Tirumala Tirupati Devasthanam, India

Dec 2014 – Apr 2015

- Delivered ASP.NET/C#/SQL Server support for the temple trust's public-facing seva booking platform.

Webtile — Vaigai Sanitation, Mylapore, India

Sep 2013 – Apr 2014

- Built and supported ASP.NET/C#/SQL Server modules for sanitation service management.

Enterprise Applications — India Cements Limited / Hyderabad Castings Limited

Mar 2013 – Sep 2014

- Developed and supported ASP.NET/C#/SQL Server business applications for manufacturing operations.
